Describe why the domain is different for the two parent graphs.

Because negatives cannot go in or out of even roots

## Task Graphing Inverse Functions

Check for understanding

#1 Graph the function

$$f(x) = 2\sqrt[3]{x-2} + 5$$

#2 Write an equation for the graph

$$f(x) = \sqrt{x} - 1$$

1.  $\sqrt[3]{x+5}$
